Oxford City Patient Participation Group Forum

11.30am – 3pm
20th November 2018
West Oxford Community Centre
Botley Road, OX2 0BT

There is limited parking at the Centre but it is easily accessible by bus and train.

Health, prevention, promotion, integration?
An exchange of information and discussion on how patient groups can add value

Oxford City PPG Forum invites patients to a meeting to find out what is happening in health and social care across the city and consider how PPGs can support this work.

The first half of the meeting will be a knowledge exchange, with various health and care professionals explaining what they do and for whom they provide services.

The second half of the workshop will focus on the priority health issues in different parts of the city, and delegates will have an opportunity to discuss with health/care providers what they can contribute.

Healthwatch Oxfordshire will be managing this event on our behalf. If you are interested in coming along please contact hello@healthwatchoxfordshire.co.uk to reserve a place. If you do not have access to email please call Healthwatch Oxfordshire on 01865 520520 and leave a message.

The Oxford City PPG Forum is supported by Oxfordshire Clinical Commissioning Group, and is made up of volunteers who chair, or participate in, the Patient Participation Groups of the Oxford City General Practices.
PROGRAMME

11.15 Registration

11.30 **Welcome** from the Chair, Tracey Rees, Manor Surgery Patient Group

11.40 **Presentations:**
What are the key health issues around the City?
What does integration mean?
How we are working together in Oxford?

- Tehmeena Ajmal, Oxfordshire System Winter Director/Urgent Care Lead with Victoria Baran & Tanya Hillier
- Bethan McDonald, Public Health, Oxfordshire County Council

Who is doing what – focus on prevention?
Series of 3 minute presentations from the Marketplace delegates, on who they are and what they do.
Q & A

12.45 **Lunch** and a chance to network and look at marketplace displays.

1.15 **Table Group Work in GP Cluster Areas**
*General practices in the City are organized into 5 clusters and the practices work together to tackle key health issues. Some services are provided across a cluster basis.*
Information will be available on each table about the key health issues in each part of the city. Discussion will focus on what can we do together as a locality? Each table will have at least one health care person.

2.15 **Discussion** on the issues arising from what we have heard, and what action will be taken (not death by feedback). Top 2 items.

2.45 Wrap up and close

**Marketplace:**
